

## ----- SPRINT 4 REPORT -----

Product Name: Data Visualization Climate Change

Team Name: Data Visualization

Sprint Completion Date: March 20, 2018

### ----- ACTIONS TO STOP DOING -----

- Naming files in non-intuitive ways
- Poorly organizing directories

### ----- ACTIONS TO START DOING -----

- Update Trello more often with accurate updates
- Group programming sessions (via discord)
- Daily messages on slack
- Implement burn-up/down charts

### ----- ACTIONS TO KEEP DOING -----

- Keep discussing on how we should best convey to our audience about climate change
- Keep Communicating and showing up on time on meetings

### ----- WORK COMPLETED / NOT COMPLETED -----

Completed User Story 1: **6 / 10**

- *As a user, I want to website to look aesthetically pleasing and bug free.*

Completed: User Story 2: **10 / 13**

- *As a developer, I want to enhance our individual visualizations to possibly display more data and look better*
  - *Choropleth color scheme & missing datapoints*

Almost completed: User Story 3:: **10/ 17**

- *As a developer I want to implement and refine features for choropleths*
  - *No Zoom*
  - *Still slow*
  - *Color scheme*

Completed: User Story 4: **9 / 10**

- *As a back-end developer I want to parse datasets into readable formats*
  - *Edge case parsing for certain countries regarding choropleths*

Completed: User Story 5: **3/ 11**

- *As a user, I want to be informed and educated by the visuals/website*
  - *Home page needs accompanying visuals*
  - *Visuals need to tell more of a story*

## ----- WORK COMPLETION RATE -----

Total User Stories Completed: 0 / 5

Total Hours Completed: 42 / 61

Notes: We put this class on the backburner as finals approached and it really shows. We're looking to use spring break to make up for lost time and get an early start on the next version of our project.
